Clayton County, Georgia

Client	Clayton County Government Jim O'Neal, CH2M Hill Construction Manager
Scope	Construction Engineering Inspection (CEI)
Contract Value	\$429,865

Clayton County Resurfacing CEI

Engineering Design Technologies, Inc. (EDT), in conjunction with the Clayton County Construction Manager, has provided construction inspection services for the county during resurfacing of various streets throughout Clayton County Commission Districts 1 through 4.

Clayton County began a five year \$240 million Special Purpose Local Option Sales Tax (SPLOST) in 2004. Approximately \$200 million was allocated towards road improvements, maintenance and safety projects and the remaining \$40 million was allocated toward Parks and Recreation.

EDT was responsible for the CEI services provided in Year 5 of the Road Maintenance/Resurfacing Program throughout all 4 Commission Districts in Clayton County. EDT performed inspections to monitor Contractor compliance with Georgia DOT specs, County plans and specs, contract documents, and approved budgets.
