

Healthfield Hospice

Henry County, Georgia

Client	Healthfield Hospice Henry Medical Investor Group George West 404.538.5257
Scope	Design/Build
Contract Value	\$1.4Million

Construction consists of a one-story wood frame hospice facility. Facility Building consist of 12 patient rooms, reception area, three administrative offices, nurses stations, medical room, nourishment room, ADA handicap bathrooms, chapel, and laundry facilities. Facility was constructed on approximately 1.8 acre, which originally would have required extensive site development and construction. However, after careful review by EDT engineering staff, the original site plans were re-designed for grading, parking, and utilizing an above ground drainage retention pond in lee of an underground storm water ration facility. The re-design gave the increased the number of parking spaces and saved the owner over \$80,000.00.

Exterior features include “stacked stone” and Stucco giving the building a “warm” home feeling. The facility also includes a spacious patio and sidewalks around the entire perimeter of the building. Interior amities include two fireplaces, three seating areas inside and outside patient rooms for family members, and a 150-gallon fish aquarium. In addition, a spacious canopy was constructed for patient and family drop-off. However, categorized as a medical facility, the building is constructed with medical grade electrical wiring, fire approved HVAC, fire sprinkler system, and fire rated walls and doors.
