Architecture

Linden Oaks Community Based Medical Home

Jack Allen Recreation Complex Facility

Huntsville Airport 5 Year A/E Services Contract

An open studio environment of eleven architects & designers alongside EDT's engineering and construction team facilitates a design process which allows key decisions be made much earlier in the design process, assuring exceptional both budget and schedule performance.

Engineering Design Technologies - Thorington-Hines Architects, LCC (EDT-THA) was established in 2005 and serves as the architectural arm of EDT. EDT-THA, a woman-owned business headquartered provides innovative design solutions and exceptional quality of client services to all projects, both large and small. EDT-THA process results in reduced change orders, reduced costs and ultimately much higher levels of customer satisfaction. EDT-THA uses the latest video and BIM software to provide interior and exterior video fly-throughs of our models to provide photo-realistic previews to our clients. This also provides increased QC/QA by reducing potential conflicts between architecture and engineering models in a 3-D view.

Market sectors include masterplanning, large-scale city urban revitalization, including parks and recreation, programming, interior design, education, aviation, government, commercial, hospitality, medical, multi-family residential, sustainable and renewable energy design and project management. We have a client focused team of architects, engineers, designers and construction professionals whose goal is to always deliver elevated design and service through effective communication with every client. Professionalism and the working relationships we have developed combined with quality work has resulted in a repeat client rate of over 86%.
